

CP 130

Aesthetic functionality

R
REYNAERS
aluminium

The new CP 130 sliding and lift & slide elements gives a wide variety of possibilities along with high performance and enhanced burglar resistance. The system is not only functional, but also offers an economical and aesthetic solution with slimline middle section. An additional asset of the system is the option to use it in combination with the Ventalis system.

The CP 130 is based on CS 68, and as such, further improves fabrication time, logistics and compatibility with the current product range. The fabrication and transportation are simplified further because all configurations (slide and lift slide monorail, 2-rail and 3-rail) are combined in one single design.

The optimised threshold solution, the enriched insulation value of $2.78 \text{ W/m}^2\text{K}$ and the possibility to use thicker glass with a weight up to 300 kg, underline the contemporary characteristics of CP 130.
